

# An Invitation

Why do  
I need  
x-rays?

What  
about the  
radiation?

What is Conebeam,  
CT and MRI?

What is the difference  
between an OPG and  
dental films?

Dear Doctor

Associate Professor Bernard Koong and Dr Tom Huang invite all your support team, including receptionists, nurses, assistants, hygienists and therapists to a free presentation,

## “RADIOLOGY IN DENTISTRY – WHAT AND WHY”

Patients frequently ask our staff why they need radiologic studies and express concern regarding the associated radiation doses.

This presentation will provide the necessary evidence based facts so that your staff can support you by providing up-to-date information to your patients.

Envision is also planning a presentation for doctors in the near future.

Drinks and snacks provided.

OPG & CEPH • XRAY • CT • CONEBEAM • MRI • US • NUC MED
